Joining the CRT-BYOD Wi-Fi (Android)

NOTE: Android Phones vary in their settings and how to access certain functions. Look for similar selections on your phone for the ones represented in this document.

Click on Settings as per below image:

![Settings Menu]

Then click on connections:

![Connections Menu]
You will then want to select Wi-Fi:

Then select CRT-BYOD from the list:
You will need the following settings (make sure you change CA certificate to ‘Do not validate’):

![Image of CRT-BYOD settings]

You will then need to put your username and password in as below (this will be your 8000XXX ID):

![Image of CRT-BYOD login screen]
You should then see the wireless network connected:
Joining the CRT-BYOD Wi-Fi (Windows 7)

Click on the Wi-Fi Icon in your system tray:

Click on the CRT-BYOD wireless network and choose connect automatically:
You will be prompted for your credentials. Enter your account details as you would normally to log onto college computers:

![Windows Security]

If you get this notification, it is letting you check this connection's security certificate and asking if you want to proceed. If you want to check the certificate (which is a good habit) click details. It should match this image. Click Connect and you're connected:

![Windows Security Alert]

The Credentials provided by the server could not be validated. We recommend that you terminate the connection and contact your administrator with the information provided in the details. You may still connect but doing so exposes you to security risk by a possible rogue server.
Joining the CRT-BYOD Wi-Fi (Mac OS X)

Click on the Wi-Fi icon:

Click on the CRT-BYOD wireless network:

You will be prompted for your credentials. Enter your account details as you would normally to log onto college computers. Remember this network if you will be using this device regularly on this wireless network:
If you get this notification, it is letting you check this connections security certificate and asking if you want to proceed. If you want to check the certificate (which is a good habit) it should match this image. Click Continue and you're connected. This only needs to happen once:
